

Effortless material movement with us

About us

We are pioneers in providing effortless material handling solutions that meet your expectations. Our top priority is to pay attention to safety and reliability. We focus on end user's requirement and offer a solution which eliminates operator's fatigue.

Our tie-up with multinational companies allows us to provide solutions with advanced technologies. We provide solutions for areas like machine shop, foundry, fettling shop, steel plant, painting shop, plating shop, assembly line, chemical industry, pharma company, warehouse, and many more.

Products & Services

- » Electric Chain Hoist
- » Electric Wire Rope Hoist
- » X-Y Rail System
- » Jib Crane
- » EOT Crane
- » Underslung Crane
- » Goliath Crane
- » Crane Kit
- » Industrial Lift
- » Conveyor

We are official channel partners of **Carl Stahl Craftsman**. **Carl Stahl Craftsman** is joint venture of Carl Stahl Germany & Craftsman Automation India. With the objective of using rich experience of Carl Stahl in material handling industry & strong manufacturing expertise of Craftsman Automation the joint venture was formed to provide the end user reliable, efficient & ergonomic lifting solutions. **Carl Stahl Craftsman** designed & manufactured systems in India to European standards.

• Electric Chain Hoists •

Standard Specifications

Lifting Range

250 Kg – 3 Ton

Classification

ISO M5, FEM 2M

Rating

Hoist – IP55 & Pendent – IP65

Certification

CE

Pendent

Double Speed

Chain Falls

Single Fall, Double Fall

Control Voltage

24 V

Supply Voltage

3 Phase, 380-415 V, 50 Hz

Limit Switch

Lifting (upper – lower) & Travel (forward – reverse)

Mounting

Hook, Plate Suspension, Manual Trolley & Power Trolley

• Electric Wire Rope Hoists •

Standard Specifications

Lifting Range

1 Ton – 50 Ton

Classification

ISO M5, FEM 2M

Rating

Hoist – IP54 & Pendent – IP65

Certification

CE

Pendent

Double Speed

Rope Falls

2, 4, 6, & 8 Fall

Control Voltage

24 V With VFD

Mounting

Power Trolley

Supply Voltage

3 Phase, 380-415 V, 50Hz

Limit Switch

Lifting (upper – lower) & Travel (forward – reverse)

• X - Y Rail System •

Standard Specifications

Lifting Range: 100 Kg – 2 Ton

X – Y Rail System offers handling load effortlessly, safely & effectively on exact location over your working area.

• Jib Crane •

Standard Specifications

Lifting Range: 100 Kg – 5 Ton

Jib Crane is cantilevered supported structure, commonly used for all types of material handling purpose.

Standard Specifications

Lifting Range: 1 Ton – 63 Ton

EOT Cranes are used for heavy material movement. Single Girder EOT Crane are compact & lightweight in design whereas Double Girder EOT Crane are heavy in design & used for very heavy duty applications.

• EOT Crane •

• Underslung Crane •

Standard Specifications

Lifting Range: 1 Ton – 5 Ton

Underslung Cranes are same as EOT cranes. These are used when there is space restriction for EOT cranes.

• Goliath Crane •

Standard Specifications

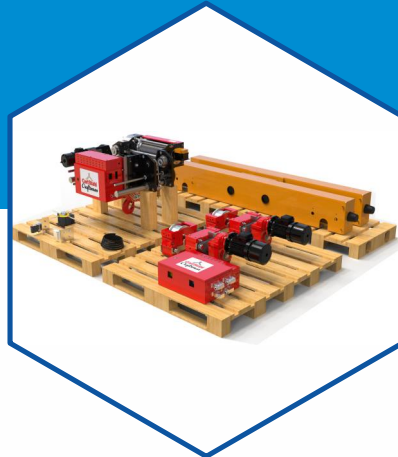

Lifting Range: 1 Ton – 63 Ton

It is mainly used for outdoor applications where shed structure is not available. It is also considered where shed structure is not capable to bear the load.

Standard Specifications

We can supply the **Crane Kits** as per requirement of customer. Crane kits include accessories like Panels & Wheel Block Set.

• Crane Kit •

• Industrial Lift •

Standard Specifications

Lifting Range: 1 Ton – 5 Ton

Industrial Lift is used for material movement from floor to floor.

• Conveyors •

We are manufacture of all types of conveyors

• AMC •

We offers **Annual Maintenance Contract** for cranes. In this we offer you a health checkup & preventive maintenance of the crane. During **AMC** we suggest you the parts that's need to be replaced because of the wear & tear. So we can avoid the major breakdown of the crane.

• Our Clientele •
